

## **2008 FORT MONMOUTH WATER DISTRIBUTION FLUSHING PROGRAM**

Listed below is the schedule for flushing the water distribution systems servicing Fort Monmouth Main Post and Charles Wood areas. Flushing will begin on Monday 2 June 2008 and be on-going for approximately six weeks. Flushing water distribution lines will be accomplished Monday through Friday during the overnight hours (2000 to 0600) for areas #1, #2, and #3. All other areas will be flushed during normal duty hours (0830 to 1500) Monday through Friday.

### **NO FLUSHING SCHEDULE FOR FRIDAY JULY 4<sup>TH</sup>.**

A temporary discoloration of the water and/or a decrease of pressure may be experienced as a result of this flushing. This procedure will NOT create a health risk associated with the water supply. However, it is recommended that before using the water, cold water should be run until it is clear while flushing is taking place in your area.

**HOUSING RESIDENTS:** It is suggested residents are cautious when doing laundry during this operation as discolored water may stain clothing. Once flushing is complete each day, washing machines should be run empty with cold water for a full cycle to clear all the lines. This will lessen the risk of staining fabrics.

Your continued cooperation is greatly appreciated and we hope this does not inconvenience your daily routine.
